The most complete volume on card making available

- Visual inspiration makes learning design principles fun and easy
- Reusable templates for making cards in every style

The *Cardmaker's Workbook* is the only book on cardmaking that a crafter will ever need, and is designed to be kept on the desk and referred to again and again. The book is divided into five chapters focusing on composition, color, theme, construction and inspiration. Instructions are clear but concise, making room for large pictures and multiple variations. The unique volume has the look of a designer's notebook with sketches and templates illustrating different card formats.

The card designs cover many different styles, from detailed multi-layered beauties to simple cards that can be quickly made and given as a set of stationery.
